

# NORTH WEST REC'S SINGLE PHASE RATES

## Residential/Single Phase Rate

Monthly Facility Charge \$15  
First 300 kWh per month @ 11.4 cents per kWh  
Next 200 kWh per month @ 7.0 cents per kWh  
Over 500 kWh per month @ 6.2 cents per kWh

## Electric Heat Rates

Monthly Facility Charge \$2  
Dual Heat - 3.5 cents per kWh (controlled)  
All Electric - 4.7 cents per kWh (uncontrolled)

The facility charge is designed to recover some of the fixed costs from all members, regardless of how many kilowatt hours (kWhs) they use and is included in the kWh charge on your electric bill. This charge includes expenses like depreciation, interest, taxes, transformers and metering, etc.

The Power Cost Adjustment (PCA) is applicable to these rates and is shown as a separate line item on your electric bill. The PCA is designed to recover only the increases in power costs. A formula based on our wholesale power cost is used to calculate the PCA factor and this factor is then applied to all kWhs that our members use in all rate classes. The factor may vary from month to month.

The effective date of these rates was July 1, 2009.

The Multiphase Rates are available by contacting the office at 800-766-2099.
